

KOCO PACKAGING MACHINERY CO.,LTD

KY-2 filling and capping machine

Technical parameter :

Model	KY-2
Filling speed	1500BPH
filling volume	100-500ml
Voltage	380V/50HZ
power	0.85KW
pressure	0.5Mpa-0.75Mpa
Equipment size	1500*1000*2100mm
Equipment weight	800kg

The machine can be customized, and can provide supporting parts and packaging materials for a long time.

Introduction to the machine :

This machine is a automatic liquid filling and capping machine. The machine features new design, automatic filling, covering, capping and unloading, high degree of automation and frequency control. The machine is applicable to the filling, capping and sealing of juice, flour paste, vinegar, Fruit jelly, dairy drinks, cleaning products, Chinese spirits and other liquid or semi-liquid in standing bags. The machine is complete with functions and features reasonable structure, convenient operation, easy maintenance and repair, convenient cleaning and compliance with

food hygiene conditions, the machine integrates the features of machine, power and gas. All electrical and pneumatic elements adopt highly reliable domestic brands, with long service life and convenient maintenance, In addition, leakage protection is provided to protect personal safety.

Supporting packaging materials :
