

# KOCO PACKAGING MACHINERY CO.,LTD

## KY-8 filling and sealing machine

### Technical parameter :

MODEL	KY-8
POWER	1.2KW
VOLTAGE	220V/50Hz
FILLING CAPACITY	50ML-500ML
PRODUCE CAPACITY	2000BPH
AIR PREESURE	0.6-0.8MPA
WEIGHT	150KGS
SIZE	1100*750*1200MM

The machine can be customized, and can provide supporting parts and packaging materials for a long time.

### Introduction to the machine :

Forming bag(inflation bags,bar milk bags,bar yogurt bags) packing machines are widely used in the dairy, beverage, liquid spices, soy products, jelly, wine, detergents, liquid chemical and the high viscosity semi-fluid(grain orange

juice,coconut,pulp milk,paste alcohol ) and so on.

The machine adopts touch screen PLC controlling,filling and sealing finish in one time automatically, thoroughly save the problem that worker fill hot liquid and avoiding secondary pollution.

- 1.Independently research and develop pneumatic sealing in controlling of PLC, completely replaced the old in-stable spring sealing.
2. Adjust the filling capacity by changing the parameter on the touch screen ,so it is much more accurate than the screw adjusting.
- 3.Adopt a special pressure filling pump to make the filling be more efficient.
- 4.For the bags which is more difficult to seal ,except the conventional temperature adjusting,we add sealing time adjustment and distance adjustment , now totally three types for adjusting.
- 5.Nozzles adopts special design,in order to make the sealing same every time.
- 6.It can fill 2-8 different liquid at the same time by customizing.

### Supporting packaging materials :
